

GasOwl

Wise-up your gas supply

GasOwl is a beautifully crafted, world-first GasScale that manages your gas supply.

Forget about ordering!

Don't be concerned any longer about the gas level in your bottles. Set GasOwl to auto-reorder with your favourite gas supplier. Or choose the best deal available locally when GasOwl lets you know your bottles are nearly empty.

Know about your gas energy usage

GasOwl gives you a live look into how you're using gas day by day. See the gas level, know how many kgs were taken away and how many kgs are in the new bottle. Only pay for what you use!

Receive helpful alerts

GasOwl is always keeping an eye open for anything unusual - higher than normal usage, and no usage. You'll know when your gas is due to arrive (and when to tie up Spot) and when it's replaced.
